ABSTRACTED-PUB-NO: BE 695026A

BASIC-ABSTRACT:

An improved laminated sign plate fabricated from plastic, preferably polyvinyl chloride which consists of at least two layers of p.v.c. one (A) at least of which is opaque and/or coloured and constitutes the back face of the sign plate, the front face of which is constituted by a transparent p.v.c. layer (B). The text of the sign is engraved in reverse and in relief on the back face of (A), the relief being deep enough to penetrate this layer. The engraved text may be coated with a suitably coloured paint or a layer of adhesive or opaque p.v.c. while intermediate layers of transparent and coloured or opalescent p.v.c. may be placed between (A) and (B).
